(the "Securities" or the "Notes")**
(ISIN: XS1241085353)

Prospectus

This document constitutes a prospectus (this "**Prospectus**") for the purposes of Article 5.3 of Directive 2003/71/EC as amended, including by Directive 2010/73/EU (the "**Prospectus Directive**") relating to the above-referenced Securities issued by Goldman Sachs International (the "**Issuer**" or "**GSI**"). This Prospectus should be read together with any documents incorporated by reference within it.

Programme

The Securities are being issued under the Series K Programme for the issuance of Warrants, Notes and Certificates (the "**Programme**") of the Issuer.

Status of the Securities

The Securities are unsecured and unsubordinated general obligations of the Issuer and not of any affiliate of the Issuer. The Securities are not bank deposits and are not insured or guaranteed by the UK Financial Services Compensation Scheme or any other government or governmental or private agency or deposit protection scheme in any jurisdiction. The payment obligations of the Issuer in respect of the Securities are not guaranteed by any entity.

***Issue Size**

On the Issue Date (being November 26, 2015), an aggregate nominal amount of EUR 50,000,000 of Securities will be issued to and made available for sale by GSI (in its capacity as Dealer), and as soon as practicable thereafter, listed and admitted to trading on both the Borsa Italiana S.p.A.'s MOT (Electronic bond market) and the regulated market of the Luxembourg Stock Exchange for purchase by investors. However, GSI reserves the right to cancel some or all of the Securities that it holds at any time prior to the Maturity Date (being November 26, 2027), such right to be exercised in accordance with applicable laws, the terms and conditions of the Securities and the applicable rules of Borsa Italiana S.p.A. and the Luxembourg Stock Exchange including as to notification. In particular, at any time following listing and admission to trading on Borsa Italiana S.p.A.'s MOT (Electronic bond market) and the regulated market of the Luxembourg Stock Exchange, GSI may cancel some or all of any Securities which have not been purchased by investors by such time. Accordingly, the aggregate nominal amount of Securities outstanding at any time may be significantly less than EUR 50,000,000, and this could have a negative impact on an investor's ability to sell the Securities in the secondary market. Notification of any such cancellation of Securities will be made on the website of Borsa Italiana S.p.A. (www.borsaitaliana.it) and in any case according to the rules of Borsa Italiana S.p.A. and on the website of the Luxembourg Stock Exchange (www.bourse.lu).

Application has been made to the Luxembourg *Commission de Surveillance du Secteur Financier* (the "CSSF"), which is the Luxembourg competent authority for the purpose of the Prospectus Directive for approval of this Prospectus as a prospectus issued in compliance with the Prospectus Directive and relevant implementing measures in Luxembourg for the purpose of giving information with regard to the Securities. This Prospectus constitutes a prospectus for the purposes of Article 5.3 of the Prospectus Directive relating to the Securities, and should be read together with any documents incorporated by reference within it.

An application has been made for the Securities to be listed on the Official List and admitted to trading on the Luxembourg Stock Exchange, a regulated market for the purposes of Directive 2004/39/EC on Markets in Financial Instruments, with effect from as practicable after the Issue Date. No assurances can be given that such application for listing and admission to trading will be granted. Application will also be made for the Securities to be listed on Borsa Italiana S.p.A. and admitted to trading on Borsa Italiana S.p.A.'s MOT (Electronic bond market), a regulated market organised and managed by Borsa Italiana S.p.A, with effect from as practicable after the Issue Date. No assurances can be given that such application for listing and admission to trading will be granted.

This Prospectus will be published on the websites of the Luxembourg Stock Exchange (www.bourse.lu) and the Issuer (www.goldman-sachs.it). On the approval of this Prospectus as a prospectus for the purpose of Article 5.3 of the Prospectus Directive by the CSSF, notification of such approval will be made to the Italian National Stock Exchange and Companies Commission (*Commissione Nazionale per le Società e la Borsa*) ("CONSOB") in its capacity as the competent authority of the Republic of Italy.

CSSF disclaimer

Pursuant to Article 7(7) of the Luxembourg Law on Prospectuses for Securities dated July 10, 2005 (as amended), by approving this Prospectus, the CSSF gives no undertakings as to the economic and financial characteristics of the Securities or the quality or solvency of the Issuer.

Credit ratings

The credit ratings of GSI¹ referred to in this Prospectus have been issued by Fitch, Inc. ("**Fitch**"), Moody's

¹ The information for this rating has been extracted from information made available by each rating agency referred to below. The Issuer confirms that such information has been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published by such ratings agencies, no facts have been omitted which would render the reproduced information inaccurate or misleading.

As at the date of this Prospectus the ratings for GSI were:

Short-term debt:

Fitch, Inc. rating was F1: An 'F1' rating indicates the highest short-term credit quality and the strongest intrinsic capacity for timely payment of financial commitments; may have an added '+' to denote any exceptionally strong credit feature.

Moody's rating was P-1: 'P-1' Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

S&P rating was A-1: A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

Long-term debt:

Fitch, Inc. rating was A: An 'A' rating indicates high credit quality and denotes expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

Moody's rating was A1: Obligations rated 'A' are considered upper-medium grade and are subject to low credit risk. Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P rating was A: An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial

Investors Service, Inc. ("**Moody's**") and Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc. ("**S&P**"), none of which entities is established in the European Union or registered under Regulation (EC) No. 1060/2009, as amended by Regulation (EU) No. 513/2011 (the "**CRA Regulation**"). In general, European regulated investors are restricted from using a rating for regulatory purposes if such rating is not either (1) issued or validly endorsed by a credit rating agency established in the European Union and registered with the European Securities and Markets Authority ("**ESMA**") under the CRA Regulation) or (2) issued by a credit rating agency established outside the European Union which is certified under the CRA Regulation.

The EU affiliates of Fitch, Moody's and S&P are registered under the CRA Regulation. The ESMA has approved the endorsement by such EU affiliates of credit ratings issued by DBRS, Fitch, Moody's and S&P. Accordingly, credit ratings issued by Fitch, Moody's and S&P may be used for regulatory purposes in the EU.

Credit ratings may be adjusted over time, and there is no assurance that these credit ratings will be effective after the date of this Prospectus. A credit rating is not a recommendation to buy, sell or hold the Securities.

The list of credit rating agencies registered under the CRA Regulation (as updated from time to time) is published on the website of the ESMA (www.esma.europa.eu/page/list-registered-and-certified-CRAs).

The initial issue size of EUR 50,000,000 could be reduced following issuance, and this could have a negative effect on your ability to sell the Securities in the secondary market. The performance of interest rates is dependent upon a number of factors, including supply and demand on the international money markets, which are influenced by measures taken by governments and central banks, as well as speculations and other macroeconomic factors. Indices which are deemed 'benchmarks' are the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, or have other consequences which cannot be predicted.

RISK FACTORS

An investment in your Securities is subject to the risks described below. You should carefully review (i) the applicable risk factors in the section entitled "Risk Factors" from the Base Prospectus incorporated by reference in this Prospectus (see the section entitled "Documents Incorporated by Reference" below) and (ii) the additional risk factors set out below, as well as the terms and conditions of the Securities described in this Prospectus. You should carefully consider whether the Securities are suited to your particular circumstances, including to consult your own professional advisers as necessary. We do not give to you as a prospective purchaser of Securities any assurance or guarantee as to the merits, performance or suitability of the Securities, and you should be aware that we act as an arm's-length contractual counterparty and not as an advisor or fiduciary.

RISK WARNING OF POTENTIAL LOSS OF SOME OR ALL OF YOUR INVESTMENT

You may lose some or all of your entire investment in the Securities where:

- **The Issuer fails or is otherwise unable to meet its payment obligations:** The Securities are unsecured obligations. They are not bank deposits and are not insured or guaranteed by the UK Financial Services Compensation Scheme or any other government or governmental or private agency or deposit protection insurance scheme in any jurisdiction. Therefore, if the Issuer fails or is otherwise unable to meet its payment obligations under the Securities, you will lose some or all of your investment.
- **The secondary sale price is less than the original purchase price:** The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive far less than your original invested amount.

These circumstances are more fully described below.

A. **FACTORS THAT MAY AFFECT OUR ABILITY TO FULFIL OUR OBLIGATIONS UNDER THE SECURITIES**

The payment of any amount due on the Securities is subject to our credit risk. The Securities are our unsecured obligations.

The Securities are not bank deposits and are not insured or guaranteed by the UK Financial Services Compensation Scheme or any other government or governmental or private agency, or deposit protection scheme in any jurisdiction. Investors are dependent on our ability to pay all amounts due on the Securities, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness.

Goldman Sachs International ("GSI") is a member of a group of companies of which The Goldman Sachs Group, Inc. is the holding company (the "**Goldman Sachs Group**" or "**Goldman Sachs**"). However, the Securities are not insured or guaranteed by The Goldman Sachs Group, Inc. ("**GSG**"), or any affiliate of GSG or any other entity. As a holder of Securities, **you will not have any recourse against The Goldman Sachs Group, Inc. or any other company in the Goldman Sachs Group other than GSI, and shall not have recourse against any other person, with respect to the performance of the Securities.**

You should also read "Risk Factors – 2. Risks relating to GSI" in the Base Prospectus incorporated by reference herein.

Risks relating to the potential exercise by a UK resolution authority of its resolution powers in relation to GSI

The EU Bank Recovery and Resolution Directive ("**BRRD**") entered into force on July 2, 2014. Its stated aim is to provide national "resolution authorities" with powers and tools to address banking crises preemptively in order to safeguard financial stability and minimise taxpayers' exposure to losses.

The majority of the requirements of the BRRD have been implemented in the UK through the UK Banking Act 2009, as amended and related statutory instruments (the "**UK Banking Act**"). The UK Banking Act provides for a "resolution regime" granting substantial powers to the Bank of England (or, in certain circumstances, HM Treasury), to implement resolution measures (in consultation with other UK authorities) with respect to a UK financial institution (for example, such as GSI) where the UK resolution authority considers that the relevant institution is failing or is likely to fail, there is no reasonable prospect of other measures preventing the failure of the institution and action is necessary in the public interest.

The resolution powers available to the UK resolution authority include powers to:

- write down the amount owing or convert the relevant securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool;
- transfer all or part of the business of the relevant institution to a "bridge bank";
- transfer impaired or problem assets to an asset management vehicle; and
- sell the relevant institution to a commercial purchaser.

In addition, the UK resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered and disapply or modify laws in the UK (with possible retrospective effect) to enable the recovery and resolution powers under the UK Banking Act to be used effectively.

You should be aware that the exercise of any such resolution power or even the suggestion of any such potential exercise in respect of GSI (or any member of the GSI group) could have a material adverse effect on the rights of holders of Securities, and could lead to a loss of some or all of the investment. The resolution regime is designed to be triggered prior to insolvency of the relevant institution, and holders of securities issued by such institution may not be able to anticipate the exercise of any resolution power (including exercise of the "bail-in" tool) by the UK resolution authority. Further, holders of securities issued by an institution which has been taken into a resolution regime will have very limited rights to challenge the exercise of powers by the UK resolution authority, even where such powers have resulted in the write down of the securities or conversion of the securities to equity.

B. FACTORS WHICH ARE MATERIAL FOR THE PURPOSES OF ASSESSING THE MARKET RISKS IN RELATION TO THE SECURITIES

1. Risks associated with the value and liquidity of your Securities

1.1 The estimated value of your Securities (as determined by reference to pricing models used by us) at the time the terms and conditions of your Securities are set on the trade date, will be less than the original issue price of your Securities

The original issue price for your Securities will exceed the estimated value of your Securities as from the trade date, as determined by reference to our pricing models and taking into account our credit spreads. The difference between the estimated value of your Securities as of the time the terms and conditions of

your Securities were set on the trade date and the original issue price is a result of many factors, including among others on issuance, the expenses incurred in creating, documenting and marketing the Securities and our own internal funding costs (being an amount based on what we would pay to holders of a non-structured security with a similar maturity). The difference may be greater when the Securities are initially traded on any secondary markets and may gradually decline in value during the term of the Securities.

In estimating the value of your Securities as of the time the terms and conditions of your Securities were set on the trade date, our pricing models consider certain variables, including principally our credit spreads, interest rates (forecasted, current and historical rates), volatility, price-sensitivity analysis and the time to maturity of the Securities. These pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. As a result, the actual value you would receive if you sold your Securities in the secondary market, if any, to others may differ, perhaps materially, from the estimated value of your Securities determined by reference to our models due to, among other things, any differences in pricing models or assumptions used by others.

1.2 **The value, quoted price and yield of your Securities (if any) at any time will reflect many factors and cannot be predicted**

The value, quoted price and yield of your Securities (if any) at any time will reflect many factors and cannot be predicted. The following factors, amongst others, many of which are beyond our control, may influence the market value of your Securities:

- interest rates and yield rates in the market;
- the time remaining until your Securities mature; and
- our creditworthiness, whether actual or perceived, and including actual or anticipated upgrades or downgrades in our credit ratings or changes in other credit measures.

If we make a market in the Securities, the price quoted by us would reflect any changes in market conditions and other relevant factors, including any deterioration in our creditworthiness or perceived creditworthiness. These changes may adversely affect the value of your Securities, including the price you may receive for your Securities in any market making transaction. To the extent that we make a market in the Securities, the quoted price will reflect the estimated value determined by reference to our pricing models at that time, plus or minus its customary bid and ask spread for similar sized trades of structured securities and subject to the declining excess amount described in risk factor 1.1 (*The estimated value of your Securities (as determined by reference to pricing models used by us) at the time the terms and conditions of your Securities are set on the trade date, will be less than the original issue price of your Securities*) above.

Further, if you sell or buy your Securities on the secondary market, you will likely be charged a commission for secondary market transactions, or, in the case of a sale of the Securities the price will likely reflect a dealer discount. This commission or discount will further reduce the proceeds you would receive for your Securities in a secondary market sale.

If you sell your Securities prior to maturity, you may receive less than the face amount or initial purchase price of your Securities.

There is no assurance that we or any other party will be willing to purchase your Securities at any price and, in this regard, we are not obligated to make a market in the Securities. See risk factor 1.3 (*Your Securities may not have an active trading market*) below.

In addition, please note that the yield of the Securities will also depend on their purchase and sale price on the secondary market. Such prices may differ significantly from the original issue price of your Securities and from the redemption price at maturity.

1.3 **Your Securities may not have an active trading market**

Unless we expressly tell you otherwise, or to the extent that the rules of any stock exchange on which the Securities are listed and admitted to trading require us to provide liquidity in respect of the Securities, there may be little or no secondary market for your Securities and you may be unable to sell them.

If we do make a market for the Securities, we may cease to do so at any time without notice to you and we are not obligated to provide any quotation of bid or offer price(s) of the Securities which is favourable to you.

Application (i) has been made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to trading on the regulated market of the Luxembourg Stock Exchange; and (ii) will be made by the Issuer (or on its behalf) for the Securities to be listed on Borsa Italiana S.p.A. and admitted to trading on Borsa Italiana S.p.A.'s MOT (Electronic bond market), a regulated market organised and managed by Borsa Italiana S.p.A., however, we give no assurance that such applications will be accepted, that any particular Securities will be so admitted, or that an active trading market in the Securities will develop. We may discontinue any such listing at any time.

Even if a secondary market for your Securities develops, it may not provide significant liquidity and transaction costs in any secondary market could be high. As a result, the difference between bid and asked prices for your Securities in any secondary market could be substantial. See also risk factor 1.2 ("*The value, quoted price and yield of your Securities (if any) at any time will reflect many factors and cannot be predicted*") above. There may be less liquidity in the secondary market for the Securities also if they are exclusively offered to retail investors without any offer to institutional investors.

On the Issue Date (being November 26, 2015), EUR 50,000,000 of Securities will be issued to and made available for sale by GSI (in its capacity as Dealer), and as soon as practicable thereafter, listed and admitted to trading on both the Borsa Italiana S.p.A.'s MOT (Electronic bond market) and the regulated market of the Luxembourg Stock Exchange for purchase by investors. However, GSI (in its capacity as Dealer) reserves its right to cancel some or all of the Securities that it holds at any time prior to the Maturity Date (being November 26, 2027), such right to be exercised in accordance with applicable laws, the terms and conditions of the Securities and the applicable rules of Borsa Italiana S.p.A. and the Luxembourg Stock Exchange including as to notification. In particular, at any time following listing and admission to trading on Borsa Italiana S.p.A.'s MOT (Electronic bond market) and the regulated market of the Luxembourg Stock Exchange, GSI (in its capacity as Dealer) may cancel some or all of any Securities which have not been purchased by investors by such time. Accordingly, the total amount of Securities outstanding at any time may be significantly less than EUR 50,000,000, and this could have a negative impact on an investor's ability to sell the Securities in the secondary market. Notification of any such cancellation of Securities will be made on the website of Borsa Italiana S.p.A. (www.borsaitaliana.it) and in any case according to the rules of Borsa Italiana S.p.A. and on the website of the Luxembourg Stock Exchange (www.bourse.lu).

You should therefore not assume that the Securities can be sold at a specific time or at a specific price during their life, and you should assume that you may need to hold them until they mature.

2. **Risks associated with certain terms of the Securities, including adjustment, substitution and amendments**

2.1 **Your Securities may be redeemed prior to maturity due to a change in law, and you may lose some**

or all of your investment

Where, due to a change in law, our performance under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) illegal or impractical, we may, in our discretion, redeem the Securities.

Following any such early redemption of the Securities, you may not be able to reinvest the proceeds from such redemption at a comparable return and/or with a comparable interest rate for a similar level of risk. You should consider such reinvestment risk in light of other available investments when you purchase the Securities.

2.2 The Issuer of your Securities may be substituted with another company

The Issuer may be substituted as principal obligor under the Securities by any company from the Goldman Sachs Group of companies. Whilst the new issuer will provide an indemnity in your favour in relation to any additional tax or duties that become payable solely as a result of such substitution, you will not have the right to consent to such substitution.

2.3 We may amend the terms and conditions of your Securities in certain circumstances without your consent; amendments to the Securities will bind all holders thereof

The terms and conditions of the Securities may be amended by us without your consent as a holder of the Securities in any of the following circumstances:

- to correct a manifest or proven error or omission;
- where the amendment is of a formal, minor or technical nature; or
- where such amendment will not materially and adversely affect the interests of holders.

In certain other circumstances, the consent of a defined majority of holders is required to make amendments. The terms and conditions of the Securities contain provisions for holders of Securities to call and attend meetings to vote upon such matters or to pass a written resolution in the absence of such a meeting. Resolutions passed at such a meeting, or passed in writing, can bind all holders of Securities, including investors that did not attend or vote, or who do not consent to the amendments.

3. Risks associated with foreign exchange rates**3.1 You may be exposed to foreign exchange risk on your Securities**

Foreign exchange fluctuations between your home currency and the currency in which payments under the Securities is denominated may affect you if you intend to convert gains or losses from the sale of Securities into your home currency.

Foreign exchange rates are, and have been, highly volatile and determined by supply and demand for currencies in the international foreign exchange markets; such fluctuations in rates are subject to economic factors, including, among others, inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks.

Foreign currency exchange rates can either float or be fixed by sovereign governments. From time to time, governments use a variety of techniques, such as intervention by a country's central bank or imposition of regulatory controls or taxes, to affect the exchange rate of their currencies. Governments

may also issue a new currency to replace an existing currency or alter the exchange rate or exchange characteristics by devaluation or revaluation of a currency. Thus, a particular concern in purchasing Securities with foreign exchange risks as described above is that their yields or payouts could be significantly and unpredictably affected by governmental actions. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the country of the relevant currency or elsewhere could lead to significant and sudden changes in the exchange rate of that currency and others. These changes could negatively (or positively) affect the value of and return on the Securities as participants in the global currency markets move to buy or sell the relevant currency in reaction to these developments.

Governments have imposed from time to time and may in the future impose exchange controls or other conditions, including taxes, with respect to the exchange or transfer of a currency that could affect exchange rates as well as the availability of the currency for a Security at its maturity or on any other payment date. In addition, your ability to move currency freely out of the country in which payment in the currency is received or to convert the currency at a freely determined market rate could be limited by governmental actions.

4. Risks associated with discretionary powers of the Issuer and the Calculation Agent including in relation to our hedging arrangements

As described elsewhere in these risk factors, the occurrence of certain events – relating to the Issuer, our hedging arrangements, taxation, the relevant currency or other matters – the occurrence of which may give rise to discretionary powers on our part (as Issuer or as Calculation Agent) under the terms and conditions of the Securities.

In relation to our hedging arrangements, we (including through one or more affiliates of the Issuer) may enter into one or more arrangements to cover our exposure to the relevant cash amounts to be paid or assets to be delivered under the Securities as these fall due. We describe some of the potential types of arrangements in risk factor 7.1 (*Our hedging, trading, issuance and underwriting activities may create conflicts of interest between you and us*) below. The particular hedging arrangements (if any) undertaken by us, and their cost, will likely be a significant determinant of the price and the economic terms and conditions of your Securities. Accordingly, if an event occurs which negatively impacts our hedging arrangements, we may have discretionary powers under the terms and conditions of your Securities as described in the paragraph immediately above to account for such impact on our hedging arrangements. The exercise by us of such discretionary powers may have a negative impact on the value of and return on your Securities.

5. Risks associated with Interest Rates as Underlying Assets

5.1 Various unpredictable factors may affect the performance of interest rates

The performance of interest rates is dependent upon a number of factors, including supply and demand on the international money markets, which are influenced by measures taken by governments and central banks, as well as speculations and other macroeconomic factors.

5.2 Floating rates may become negative, resulting in loss of any positive margin

A negative floating rate may reduce any positive margin payable on your Securities: As the Interest Rate of your Securities for certain Interest Periods is the sum of 3 Month Euro floating rate for the relevant Interest Period plus a margin, and the conditions of the Securities specifies "Reference Rate 0% Floor" to be not applicable, a negative 3 Month Euro floating rate will reduce the margin, potentially to zero. Accordingly, you may receive an Interest Rate on your Securities that is lower than the margin and this would adversely affect the value of and return on your Securities.

5.3 Reform of LIBOR and EURIBOR and other interest rate index and equity, commodity and foreign exchange rate index "benchmarks"

The London Inter-Bank Offered Rate ("**LIBOR**"), the Euro Interbank Offered Rate ("**EURIBOR**") and other indices which are deemed "benchmarks" are the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such "benchmarks" to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Securities linked to a "benchmark".

Key international proposals for reform of "benchmarks" include IOSCO's Principles for Financial Market Benchmarks (July 2013) (the "**IOSCO Benchmark Principles**") and the European Commission's proposed regulation on indices used as "benchmarks" in certain financial instruments, financial contracts and investment funds (September 2013) (the "**Proposed Benchmark Regulation**").

The IOSCO Benchmark Principles aim to create an overarching framework of principles for benchmarks to be used in financial markets, specifically covering governance and accountability as well as the quality and transparency of benchmark design and methodologies. A review published in February 2015 of the status of the voluntary market adoption of the IOSCO Benchmark Principles noted that, as the benchmarks industry is in a state of change, further steps may need to be taken by IOSCO in the future, but that it is too early to determine what those steps should be. The review noted that there has been a significant market reaction to the publication of the IOSCO Benchmark Principles, and widespread efforts being made to implement the IOSCO Benchmark Principles by the majority of administrators surveyed.

The Proposed Benchmark Regulation is still being negotiated between the relevant European authorities, but the European Commission expects a final agreement by the summer of 2015 and it is therefore likely to become effective in fall 2016. If passed in its current form (as appears likely), the Proposed Benchmark Regulation would apply to "contributors", "administrators" and "users" of "benchmarks" in the EU, and would, among other things, (i) require benchmark administrators to be authorised (or, if non-EU-based, to be subject to an equivalent regulatory regime) and to comply with extensive requirements in relation to the administration of "benchmarks" and (ii) ban the use of "benchmarks" of unauthorised administrators. The scope of the Proposed Benchmark Regulation is wide and, in addition to so-called "critical benchmark" indices such as LIBOR and EURIBOR, could also potentially apply to many other interest rate indices, as well as equity, commodity and foreign exchange rate indices and other indices (including "proprietary" indices or strategies) which are referenced in listed financial instruments (including listed Securities), financial contracts and investment funds.

If passed in its current form, the Proposed Benchmark Regulation could have a material impact on any listed Securities linked to a "benchmark" index, including in any of the following circumstances:

- an index which is a "benchmark" could not be used as such if its administrator does not obtain authorisation or is based in a non-EU jurisdiction which (subject to any applicable transitional provisions) does not have equivalent regulation. In such event, depending on the particular "benchmark" and the applicable terms of the Securities, the Securities could be de-listed, adjusted, redeemed or otherwise impacted; and
- the methodology or other terms of the "benchmark" could be changed in order to comply with the terms of the Proposed Benchmark Regulation, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could lead to adjustments to the terms of the Securities including Calculation Agent determination of the rate or level in its discretion.

In addition to the international proposals for reform of "benchmarks" described above, there are numerous other proposals, initiatives and investigations which may impact "benchmarks". For example, in the UK, the national government has recently extended the legislation originally put in place to cover LIBOR to regulate the following additional major UK-based financial benchmarks in the fixed income, commodity and currency markets:

- o ISDAFIX (now ICE Swap Rate), which is the principal global benchmark for swap rates and spreads for interest rate swap transactions
- o London Gold Fixing (now LBMA Gold Price) and the London Silver Fixing (now LBMA Silver Price), which determine the price of gold and silver in the London market
- o ICE Brent Index, traded on the ICE Futures Europe (IFEU) exchange, which acts as the crude oil futures market's principal financial benchmark
- o WM/Reuters London 4pm Closing Spot Rate, which is the dominant global foreign exchange benchmark
- o SONIA (Sterling Overnight Index Average) and RONIA (Repurchase Overnight Index Average), which both serve as reference rates for overnight index swaps

Any of the international, national or other proposals for reform or the general increased regulatory scrutiny of "benchmarks" could increase the costs and risks of administering or otherwise participating in the setting of a "benchmark" and complying with any such regulations or requirements. Such factors may have the effect of discouraging market participants from continuing to administer or participate in certain "benchmarks", trigger changes in the rules or methodologies used in certain "benchmarks" or lead to the disappearance of certain "benchmarks". The disappearance of a "benchmark" or changes in the manner of administration of a "benchmark" could result in adjustment to the terms and conditions, early redemption, discretionary valuation by the Calculation Agent, delisting or other consequence in relation to Securities linked to such "benchmark". Any such consequence could have a material adverse effect on the value of and return on any such Securities.

6. Risks associated with taxation

Tax laws may change and this may have a negative impact on your Securities

Tax law and practice is subject to change, possibly with retrospective effect and this could adversely affect the value of your Securities to you and/or their market value generally. Any such change may (i) cause the tax treatment of the Securities to change from what you understood the position to be at the time of purchase; (ii) render the statements in this Prospectus concerning relevant tax law and practice in relation to the Securities inaccurate or inapplicable in some or all respects to certain Securities or have the effect that this Prospectus does not include material tax considerations in relation to certain Securities; or (iii) give us the right to redeem the Securities early, if such change has the effect that our performance under the Securities or hedging transaction relating to the Securities is unlawful or impracticable (see risk factor 2.1 (*Your Securities may be redeemed prior to maturity due to a change in law, and you may lose some or all of your investment*)). **You should consult your own tax advisers about the tax implications of holding any Security and of any transaction involving any Security.**

7. Risks associated with conflicts of interest between Goldman Sachs Group and purchasers of Securities

The various roles and trading activities of Goldman Sachs could create conflicts of interest between you and us.

7.1 Our hedging, trading, issuance and underwriting activities may create conflicts of interest between you and us

In anticipation of the sale of the Securities, we and/or our affiliates may (but are not obligated to) enter into hedging transactions involving purchase of the underlying components, indices designed to track the performance of the relevant markets or components of such markets or other transactions on or before the trade date. In addition, from time to time after we issue the Securities, we and/or our affiliates expect to enter into additional hedging transactions and to unwind those we have entered into, in connection with the Securities and perhaps in connection with other Securities we issue, some of which may have returns linked to commodities or foreign currencies or other assets. Consequently, with regard to your Securities, from time to time, we may acquire or dispose of the specified currency of the Securities in foreign exchange transactions involving other currencies.

We and/or our affiliates may acquire a long or short position in securities similar to your Securities from time to time and may, in our or their sole discretion, hold or resell those securities.

In the future, we and/or our affiliates expect to close out hedge positions relating to the Securities and perhaps relating to other Securities with returns linked to foreign currencies. We expect these steps to involve sales of instruments linked to the foreign currencies on or shortly before the trade date. These steps also may involve sales and/or purchases of listed or over-the-counter options, futures or other instruments linked to the foreign currencies, constituent indices or indices designed to track the performance of the exchange or other markets or other components of such markets, as applicable.

7.2 As Calculation Agent, we will have the authority to make determinations that could affect the market value and return on your Securities

The Calculation Agent is GSI. The Calculation Agent has the authority (i) to determine whether certain specified events and/or matters so specified in the conditions relating to the Securities have occurred, and (ii) to determine the consequence of such event, including potentially, revised calculations, adjustments, postponements or early redemption of the Securities. See risk factor 4 (*Risks associated with discretionary powers of the Issuer and the Calculation Agent including in relation to our hedging arrangements*) above. Any such determination made by the Calculation Agent (in the absence of manifest or proven error) shall be binding on the Issuer and all purchasers of the Securities. Any such determinations may have an adverse impact on the value of and return on the Securities.

8. Risks associated with potential 'bail-in' of Securities

See "*Risks relating to the potential exercise by a UK resolution authority of its resolution powers in relation to GSI*" above.
