What are the key risks that are specific to the securities?

Risk factors associated with the securities: The Notes are subject to the following key risks:

- The market price of any Notes we may issue may be influenced by many unpredictable factors and if you buy a Note and sell it prior to the stated maturity date, you may receive less than the face amount of your Note.

- Any Notes we may issue may not have an active trading market; the aggregate nominal amount outstanding at any given time may be significantly less than that outstanding on the issue date, and this could have a negative impact on your ability to sell the Notes in the secondary market.
- Sales and issuances of Notes in Italy through the MOT may be on terms and subject to conditions that differ from typical offers of debt securities in Italy, including in certain cases the condition that the Notes be approved for admission to trading on the MOT by Borsa Italiana and the right of the Goldman Sachs Group, Inc. to terminate the offer prior to issuance.
- If we redeem your Notes or there is an adjustment upon a change in law, you may receive less than your initial investment.
- The Notes we may issue are not insured by the Federal Deposit Insurance Corporation.

There are also risks associated with Notes payable in or linked to currencies other than your own principal currency. These include:

- An investment in a foreign currency note involves currency-related risks.
- Changes in foreign currency exchange rates can be volatile and unpredictable.
- Government policy can adversely affect foreign currency exchange rates and an investment in a foreign currency note.
- We may not adjust any Notes to compensate for changes in foreign currency exchange rates.
- The manipulation of published currency exchange rates and possible reforms affecting the determination or publication of exchange rates or the supervision of currency trading could have an adverse impact on your Notes.

There are also risks associated with Notes payable in or linked to currencies other than U.S. dollars. These include:

- Non-U.S. dollar notes will permit us to make payments in U.S. Dollars or delay payment if we are unable to obtain the specified currency.
- In a lawsuit for payment on a non-U.S. dollar note, an investor may bear foreign currency exchange risk.
- Determinations made by the exchange rate agent are made at its sole discretion.
