What are the key risks that are specific to the securities?

Risk factors associated with the securities: The Notes are subject to the following key risks:

- The market price of any Notes we may issue may be influenced by many unpredictable factors and if you buy a Note and sell it prior to the stated maturity date, you may receive less than the face amount of your Note.
- Changes in interest rates are likely to affect the market price of any Notes we may issue.
- Any Notes we may issue may not have an active trading market; the aggregate nominal amount outstanding at any given time may be significantly less than that outstanding on the issue date, and this could have a negative impact on your ability to sell the Notes in the secondary market.
- Changes in our credit ratings may affect the market price of a Note.
- Sales and issuances of Notes in Italy through the MOT may be on terms and subject to conditions that differ from typical offers of debt securities in Italy, including in certain cases the condition that the Notes be approved for admission to trading on the MOT by Borsa Italiana and the right of the Goldman Sachs Group, Inc. to terminate the offer prior to issuance.
- Holders of the Issuer's Notes could be at greater risk for being structurally subordinated if the Issuer sells or transfers its assets substantially as an entirety to one or more of its subsidiaries.
- There are also risks associated with notes payable in or linked to currencies other than U.S. dollars.
- The Notes we may issue are not insured by the Federal Deposit Insurance Corporation.
- If we redeem your Notes or there is an adjustment upon a change in law, you may receive less than your initial investment.
- Distributors or other entities involved in the offer or listing of the Notes may have potential conflicts of interest.
