9. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

Classification for U.S. Tax Purposes

We have determined that there is a material risk that the Certificates will not be treated as a debt instrument, but will rather be treated as a forward or derivative contract, for United States federal income tax purposes. In light of this possibility, we intend to treat the Certificates in the manner described under "*United States Tax Considerations – Securities Issued by GSFCI – Securities that are not Classified as Debt for United States Tax Purposes*" in the Base Prospectus. If the Certificates bear periodic coupons, then, due to uncertainty regarding the U.S. withholding tax treatment of coupon payments on Certificates that are not treated as debt, it is expected that withholding agents will (and we, if we are the withholding agent, intend to) withhold on coupon payments on the Certificates at a 30 per cent. rate or at a lower rate specified by an applicable income tax treaty under an "other income" or similar provision. No additional amounts will be paid for such withholding tax by us or by the applicable withholding agent. Amounts paid upon the redemption or maturity of the Certificates (other than any periodic coupons that are paid at such time) are not expected to be subject to U.S. withholding tax and, if we (including any of our affiliates) are the withholding agent, we do not intend to withhold on such amounts. You should consult your own tax advisor regarding the U.S. tax consequences of purchasing, holding and disposing of the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) the Issue Price is EUR 1,000 per Certificate and the Calculation Amount is EUR 1,000;
- (ii) in respect of the Underlying Asset and the Valuation Date scheduled to fall on May 27, 2024, the Autocall Level is 100 per cent. (100%) of the Asset Initial Price and the Coupon Barrier Level is 60 per cent. (60%) of the Asset Initial Price;
- (iii) in respect of the Underlying Asset and the Valuation Date scheduled to fall on October 27, 2026, the Coupon Barrier Level is 60 per cent. (60%) of the Asset Initial Price; and
- (iv) the Coupon Value Multiplicand is 0.0064.

COUPON AMOUNT

AUTOMATIC EARLY EXERCISE

Example 1 – Automatic Early Exercise and Coupon Amount: The Reference Price of each Underlying Asset for the Valuation Date scheduled to fall on December 2, 2024 is greater than or equal to its respective Autocall Level of the Autocall Level, being 100 per cent. (100%) of the Asset Initial Price of such Underlying Asset. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 12.

In this Example, the Certificates will be automatically exercised on such Valuation Date, and the Automatic Early Exercise Amount payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Valuation Date will be an amount in the Settlement Currency equal to the Autocall Event Amount, i.e., EUR 1,000. Additionally, a Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date falling on such Automatic Early Exercise Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, multiplied by (b) 0.0768, *minus* (ii) the *aggregate* of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding such Valuation Date.

Example 2 – no Automatic Early Exercise but Coupon Amount: The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on December 2, 2024 is less than its Autocall Level, and the Reference Price of the other Underlying Asset for such Valuation Date is greater than or equal to its respective Coupon Barrier Level. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 12.

In this Example, the Certificates will not be automatically exercised on such Valuation Date. A Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date falling on such Automatic Early Exercise Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, multiplied by (b) 0.0768, *minus* (ii) the *aggregate* of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding such Valuation Date.

Example 3 – no Automatic Early Exercise and no Coupon Amount: The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on December 2, 2024 is less than its Coupon Level, and the Reference Price of the other Underlying Asset for such Valuation Date is greater than or equal to its respective Autocall Level.

In this Example, the Certificates will not be automatically exercised on such Valuation Date and no Coupon

Amount will be payable on the Coupon Payment Date immediately following such Valuation Date.

SETTLEMENT AMOUNT

Example 4 – neutral scenario and Coupon Amount: *The Certificates have not been exercised on an Applicable Date, and the Final Closing Price of each Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 36.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to 100 per cent. (100%) of the Calculation Amount, i.e., EUR 1,000. Additionally, a Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date falling on such Automatic Early Exercise Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, multiplied by (b) 0.2304, *minus* (ii) the aggregate of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding such Valuation Date.

Example 5 – neutral scenario but no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is 59 per cent. (59%) of its Asset Initial Price and the Final Closing Price of the other Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to 100 per cent. (100%) of the Calculation Amount, i.e., EUR 1,000. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date.

Example 6 – negative scenario and no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is 54 per cent. (54%) of its Asset Initial Price and the Final Closing Price of the other Underlying Asset is 55 per cent. (55%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Reference Value, *divided* by (b) the Initial Reference Value, i.e., EUR 540. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date. **In this Example, an investor who purchased the Certificates at the Issue Price will sustain a substantial loss of the amount invested in the Certificates.**

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer and Guarantor. The Securities are the Issuer's unsecured obligations and the Guarantee is the Guarantor's unsecured obligation. Investors are dependent on the Issuer's and Guarantor's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's and Guarantor's credit risk and to changes in the market's view of the Issuer's and Guarantor's creditworthiness. Neither the Securities nor the Guarantee are bank deposits, and neither are insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's and the Guarantor's ability to fulfil their obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSFCI is a wholly-owned subsidiary of the Goldman Sachs group. GSFCI is primarily involved in issuing securities, lending and entering into derivatives transactions with its affiliates for hedging purposes, and does not carry out any other operating business activities. As a result, GSFCI does not have a significant amount of share capital. Investors are exposed to a significantly greater credit risk by purchasing the Securities where GSFCI is the Issuer than they would be by purchasing securities from an issuer equipped with significantly more capital. If GSFCI becomes insolvent, investors may lose some or all of the amount invested.

Risk factors associated with the Guarantor:

- GSG is the parent holding company of the group of companies comprising Goldman Sachs. Goldman Sachs is a leading global investment banking, securities and investment management firm that faces a variety of significant risks which may affect GSG's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- Investors are exposed to the credit risk of GSG and its subsidiaries since the assets of GSG consist principally of interests in its subsidiaries. GSG's right as a shareholder to benefit in any distribution of assets of any of its subsidiaries upon the subsidiary's liquidation or otherwise, is junior to the creditors of GSG's subsidiaries. As a result, investors' ability to benefit from any distribution of assets of any of GSG's subsidiaries upon the subsidiary's liquidation or otherwise, is junior to the creditors of GSG's subsidiaries. Any liquidation or otherwise of a subsidiary of GSG may result in GSG being liable for the subsidiary's obligations which could reduce its assets that are available to satisfy its obligations under the guarantee.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted.

- Depending on the performance of the Underlying Assets, you may lose some or all of your investment.
- The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive far less than your original invested amount.
- Your Securities may be redeemed in certain extraordinary circumstances set out in the conditions of the Securities prior to scheduled maturity and, in such case, the early redemption amount paid to you may be less than the amount you paid for the Securities and might be zero.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the Securities are subject to a cap, so your ability to participate in any change in the value of the Underlying Assets over the term of the Securities will be limited, no matter how much the level, price, rate or other applicable value of the Underlying Assets may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Assets directly.
- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any Underlying Asset fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any settlement amount, you may receive no interest payments and/or could lose some or all of your initial investment.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets*
The return on your Securities depends on the performance of the Underlying Assets. The price of the Underlying Assets may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance*
You should not regard any information about the past performance of the Underlying Assets as indicative of the range of, or trends in, fluctuations in the Underlying Assets that may occur in the future. Underlying Assets may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.
